

Product Overview

Pushbuttons and switches
Emergency-stop buttons
Panel mount jacks
Industrial networks
RFID systems
Enclosures
Wireless systems
Pedal switches
Terminal blocks
Customised solutions

GEORG SCHLEGEL GmbH & Co. KG is a leading supplier of control units to operate machines and devices. For more than 75 years SCHLEGEL has been developing, designing and producing emergency-stop switches, enclosures, control panels, pushbuttons and switches as well as RFID systems, modular bus systems, panel mount jacks and terminal blocks for many industries.

The family company based in Dürmentingen has another production site in Leipzig and sales offices in Austria, Singapore, China and the USA. In addition, SCHLEGEL has distributors in more than 80 countries on five continents. Renowned companies all around the globe have trust in the quality of SCHLEGEL products.

SCHLEGEL products, all "Made in Germany", are characterised by high quality and award-winning design. Our extensive product portfolio in a modular system is perfectly harmonised so that elements of our series allow versatile combinations.

The high degree of independence and high production depth gives us the necessary scope for demanding tasks. Our customers appreciate this flexibility when looking for customised solutions. A close support in the development and production process is just as natural for us as a transparent and fair culture of cooperation.

The company GEORG SCHLEGEL GmbH & Co. KG is a company with tradition which also faces the new challenges of the future with pleasure. With our innovative products we ensure a further development in our target industries. True to the company's motto: "If you stop trying to improve, one day you will stop being good."

→ PEDAL SWITCHES

Robust light metal enclosures with extreme durability characterise the pedal switches of SCHLEGEL. Pedal switches are used as alternative operating devices on systems and machines where a manual operation of the button is not possible or makes no sense.

These are the characteristics of the pedal switches of SCHLEGEL:

- Red pedal covering the whole switch, with anti-slip crosswise ribbing
- Equipped with an oil and chemical resistant rubber membrane which is protectively placed
- Tightness against dust and humidity as well as hose water acc. to IP65
- With stroke limitation to protect against mechanical overload
- Protection class: II (protective insulation)
- Usable in extreme temperatures from -30 °C to 70 °C
- Mechanical lifetime: 1 million switching cycles
- Electrical lifetime (rated load): 1 million at 250 V/10(6) A
