

FP

Flanged plates

Description

Product description

We supply complete flanged plates FP with cut-outs 112 × 36 mm for enclosures of the AE series. The cut-outs, as well as the drilling template, conform to the standard cut-outs for 24-pole industrial connectors.

All flanged plates are RAL 7035 powder-coated. Please use the gaskets of the standard plates. Enclosures are supplied with gaskets and screws.

We recommend to fasten the cable entry systems with a torque of 1.5 - 2.0 Nm.

Advantages

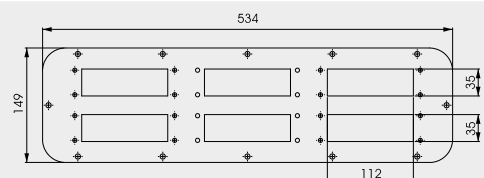

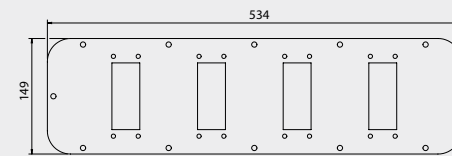

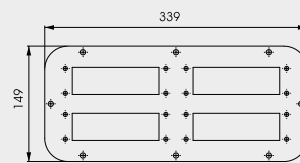

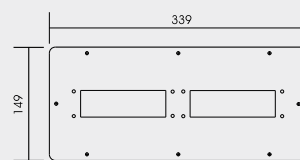

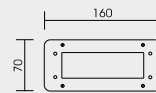

- No expensive extra sheet metal work is required
- High packing density is achieved by using KEL, KEL-ER, KEL-DPZ or KEL-DP
- Reduce labor costs by using cable entry systems KEL, KEL-ER, KEL-DPZ or KEL-DP compared to the assembly of conventional cable glands

Specification

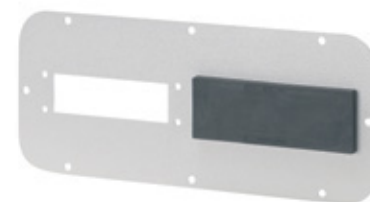

Material **Steel, powder-coated**

FP

Flanged plates

Description

Plates for terminal boxes

The FP flanged plates type KL, designed to fit the Rittal KL series terminal boxes, are installed in combination with a cable entry system for either pre-terminated or standard cables. FP flanged plates are pre-cut, pre-drilled and painted for easy and quick installation of icotek cable routing products.

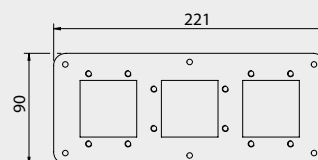

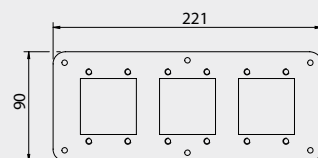

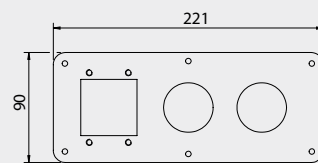

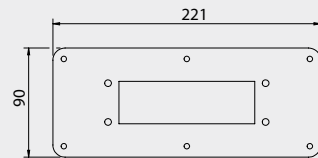

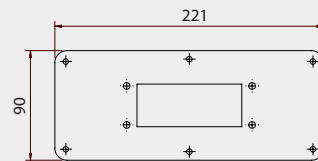

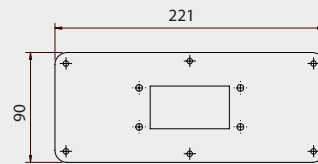

We recommend to fasten the cable entry systems with a torque of 1.5 - 2.0 Nm.

Flanged plates

Description

Plates for bus enclosures

The FP flanged plates type BG, designed to fit the Rittal BG series enclosures, have 3 cut-outs that match the dimensions of the standard cut-outs for the 24-pole industrial connectors. These flanged plates are installed in combination with a cable entry system for either pre-terminated cables (KEL-DPZ or KEL-DP) or standard cables (KEL 24 or KEL-ER 24).

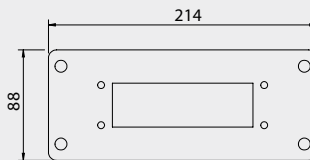

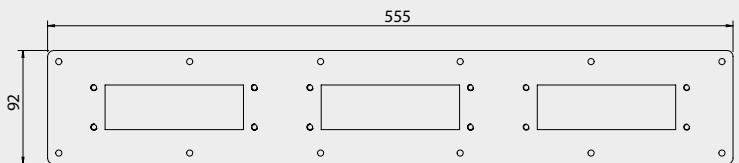

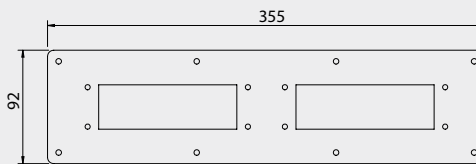

We recommend to fasten the cable entry systems with a torque of 1.5 - 2.0 Nm.
