

## Actuators for safety switches NX/TX

- ▶ Actuators made of stainless steel
- ▶ Two stainless safety screws per actuator
- ▶ With rubber bush

### Straight actuator

The straight actuator is used on sliding doors or hinged doors with door radii greater than 300 mm. Safety screws prevent unscrewing of the actuator.

### Actuator with overtravel

- ▶ **2 mm** for doors with normal play
- ▶ **7 mm** for doors with large play (optional)

### Actuators with rubber bushings

For flexible mounting of the actuator.

### Hinged actuator

For door radii less than 300 mm a hinged actuator should be used. The spring action movement of the actuator prevents damage due to the actuator jamming in the actuating head. Depending on the movement of the safety guard, the actuator must be selected for left/right or top/bottom.

### Screws made of stainless steel

The safety screws included can be inserted with a normal tool, but cannot be removed again.

### Actuator X-GQ straight

Rubber bush, overtravel 2 mm

### Dimension drawings

### Actuator X-WQ bent

Rubber bush, overtravel 2 mm

### Actuator X-GNQ straight

Rubber bush, overtravel 7 mm

### Actuator X-WNQ bent

Rubber bush, overtravel 7 mm
